Pregnancy Determination

This section contains information for billing services to determine if a recipient is pregnant, including office visits and pregnancy testing.

**Note:** For assistance in completing claims for pregnancy services, refer to the *Pregnancy Examples* section in this manual.

**Initial Office Visit**

When a patient is first seen, an office visit code (CPT® codes ‹‹99202›› thru ‹99215 ‹and 99417››) should be billed with the diagnosis reflecting the actual reason the patient was seen (for example, amenorrhea, ICD-10-CM diagnosis code N91.0 thru N91.2). Office visits are not reimbursable with a pregnancy-related diagnosis.

**Pregnancy Testing**

Refer to the *Pathology: Urinalysis* section of this manual for information about pregnancy testing.

**Pregnancy Verification for Eligibility**

County welfare departments will accept as verification of pregnancy either self-attestation of pregnancy, or a written statement from the physician, physician’s assistant, certified nurse midwife, nurse practitioner, or designated medical or clinic personnel with access to the patient’s medical records. The statement must give the estimated date of confinement and provide sufficient information to substantiate the diagnosis. Pregnant patients applying for Medi-Cal must either self-attest to pregnancy or submit the written statement as part of their application.

**Note:** Pregnancy verification is not required for women applying for the Minor Consent Program.

A signature stamp, photocopy or carbon copy is acceptable if initialed or counter-signed by the designated medical or clinic personnel providing the verification.
